

NILESH GARG

Honors Computer Science Student

PROFESSIONAL SUMMARY

AI Explorer & Computer Science Student passionate about leveraging artificial intelligence to revolutionize industries. Experienced in developing end-to-end AI prototypes, organizing hackathons, and building scalable ML solutions. Strong background in deep learning frameworks, cloud platforms, and agent-based systems with proven ability to deliver results under tight deadlines.

EMPLOYMENT HISTORY

CO-ORGANIZER, VIBE CODING HACKATHON May 2025 - Jun 2025
C.T. Bauer College of Business, University of Houston

- ♦ Coordinated team efforts for hackathon, boosting engagement and fostering innovative projects.

RESEARCH GUIDE AUTHOR Oct 2024 - May 2025
University of Houston Library

- Authored comprehensive methodology guides for Computer Science and Earth & Atmospheric Sciences
- Simplified complex technical processes for student and faculty reference

AI TECH EVANGELIST & CONTENT CREATOR Present
Self-Directed Professional Development

- Engaged with venture capitalists in Austin and C-suite executives in Boston to learn from industry leaders
- Published weekly LinkedIn insights on AI/ML applications, growing professional network to 8,000+ connections

EDUCATION

BACHELOR OF SCIENCE IN COMPUTER SCIENCE May 2027
University of Houston Houston, TX

GPA: 3.64/4.00
Minor in Energy and Sustainability
Secretary, Cougar AI

COURSES

FUNDAMENTALS OF DEEP LEARNING May 2024
NVIDIA

AI AGENTS FOR BEGINNERS Jun 2025
Microsoft

GOOGLE CLOUD SDK FUNDAMENTALS Jul 2025
Google

SKILLS

Python, JavaScript, TypeScript, PyTorch, TensorFlow, LangChain, RAG, Flutter, Streamlit, Gradio, Docker, Git, Google Cloud Platform, Azure.

ADDITIONAL INFORMATION

KEY PROJECTS

Automated University Credit Transfer System: Developed intelligent automation tool using Azure Document Intelligence and GPT-4 that processes PDF transcripts, matches UH-equivalent courses, and calculates credits/GPA—reducing processing time from 14+ days to minutes

Real-Estate AI Assistant: Built Streamlit application leveraging RAG technology to automate property valuations and market analysis

MNIST Visualizer: Developed interactive digit classification system using Gradio and PyTorch with real-time inference capabilities

HACKATHON EXPERIENCE

Completed: IBM TechXchange 'AI & Automation Unpacked', QVIDTVM x Ion, IdeaWars • Upcoming: HackRice, VT Hacks • Specialized in rapid prototyping of ethical, human-centered AI solutions under extreme time constraints • Demonstrated ability to deliver functional end-to-end products within 24-48 hour timeframes
