EDUCATION

University of Houston, Houston, TX

Expected **May 2028**

Bachelor of Science in Computer Science with Honors

Minor: Energy and Sustainability

GPA: 3.64

Relevant Coursework : The Human Situation, Technology Entrepreneurship, Linear Algebra, Discrete Mathematics

WORK EXPERIENCE

Cullen College of Engineering, Houston, TX

May 2025 - August 2025

Peer Assistant

- Facilitated 23 orientations for 1,000+ students and resolved daily inquiries, providing campus navigation, lab registration support, and assistance with course registration, admissions, and credit evaluations.

University of Houston Libraries, Houston, TX

October 2024 - May 2025

Peer Mentor

- Co-led library workshops for business students, training peers on research tools, databases, and resources.
- Redesigned [Computer Science](#) and [Earth & Atmospheric Sciences](#) guides to improve usability and integration.
- Delivered evidence-based Apollo Program presentation to promote critical thinking and debunk conspiracies.

PROJECT EXPERIENCE

Bio Literature Research Agent

- Built a LangGraph-powered agent for automating literature discovery from PubMed, implementing AI-driven summarization, modular architecture, rate-limiting, and dynamic workflow visualization.
- Planned features include advanced cyclical workflows, multi-database integration (PubMed, arXiv, bioRxiv), citation network analysis, and an interactive Q&A interface.
- Repository:** [GitHub](#)

Automated University Credit Transfer System

- Built an AI tool using Azure Document Intelligence and GPT-4 to automate transcript evaluation, map PDFs to University of Houston courses, and cut processing from 14+ days to under 1 minute.
- Delivered a scalable solution with minimal manual configuration, improving accuracy and efficiency.
- Live Site:** [View Live](#)

EDITH – Knowledge Platform | realnileshgarg.com

- Developed dynamic knowledge platform using Next.js 14 and TypeScript with semantic search capabilities to create personal technology insights hub for publishing opinions and analysis across diverse domains.
- Implemented operational platform featuring intelligent search with 150+ concept relationships, automated RSS feed generation, newsletter integration, and file-based content management system.
- Planned features include AI chatbot trained on personal writings, automated newsletter generation for enhanced subscriber engagement, and publishing analytical content across emerging technology sectors.
- Live Site:** [View Live](#)

LEADERSHIP EXPERIENCE

Cougar AI, Houston, TX

January 2025 - May 2025

Secretary

- Handled communications, coordinated events, and suggested workshops and collaborations.

SKILLS

Technical/Computer Skills: Full-Stack Development (Next.js, React, TypeScript), AI Agent Development, LangGraph Multi-Agent Systems, Agentic Workflow Design, Document Intelligence (Azure), OpenAI API, Semantic Search, N8N Automation, Google Cloud Platform, CI/CD (Vercel), RSS/XML, SQL

Languages: English (Fluent), Punjabi (Native)

Certifications: Fundamentals of Deep Learning – NVIDIA

HONORS AND AWARDS

- Global Finalist and Regional Winner (**Top 3%**) in Uber Global Hackathon in Data Category
- Ideawars 3rd Place - Business Ideation Hackathon by UH Wolff Center
- University Distinguished & Academic Excellence Scholarships
